Hello! I'm Muhammad Anamul Amin, a dedicated Full Stack Developer with 5 months of experience specializing in the MERN stack (MongoDB, Express.js, React, Node.js). I've developed 7 full-stack applications, 5 React front-end projects, and a desktop application using Electron. My focus is on creating seamless, user-friendly applications that enhance user experiences. I'm eager to continue expanding my skills and contributing to the tech community.

Technical Skills

Front-end
- HTML
- CSS
- JavaScript
- Tailwind CSS
- React.js
- Next.js
- Axios
- Redux

- Creativity
- Time Management

Back-end
- Node Js
- MongoDB
- Express
- Firebase Storage
- Firebase Authentication
- Json Web Token
- CRUD Oparation
- AWS S3

Soft Skills
- Attention to Detail
- Honesty

Other Tools
- GitHub
- Vercel
- Visual Studio Code
- Figma
- Postman
- Compass
- npm
- DigitalOcean

- Continuous Learning
- Collaboration

My Works

Team & Client Project-1: MultiGym Web Application
Demo | Client Code | Server Code

- **Overview:** MultiGym is a comprehensive web application designed to enhance gym management and user engagement.
- **User Interaction:** Dynamic class scheduling, membership management, and real-time notifications.
- **Smart Filtering:** Advanced search options for classes and trainers, personalized recommendations, and filterable schedules.
- **Enhanced Experience:** Seamless booking system, user profile customization, and integration with fitness tracking devices.

Technology Stack: React, Tailwind CSS, Axios, TanStack, Swiper, React-Hook-Form, Zod. Node.js, Express, MongoDB, Firebase Admin SDK, Socket.io, AWS SDK (S3), Bcrypt.js, Express-Validator, Node-Cron, Nodemon.

Team & Client Project-2: MultiSports - Sports E-commerce Platform
Demo | Client Code | Server Code

- **Smart Filtering:** Price filters for budget-friendly searches. Category selection with check buttons for targeted product discovery.
- **Enhanced Shopping:** Seamless "Add to Cart" functionality using local storage. Layout toggle button for personalized viewing preferences. Improved product visibility through category-based selection.
- **Category Selection with Check Buttons:** Allows users to focus on specific product categories for targeted browsing.
- **Delivery Integration:** Integrated with Pathao and Steadfast courier services for reliable and timely product delivery. Pathao offers same-day delivery within Dhaka metropolitan areas, ensuring swift.
- **Personalized Admin Panel:** Provides a tailored dashboard for managing products, orders, vendors, and customer interactions.
- **Product Approval System:** Allows admins to review and approve products before they are published on the platform.

Technology Stack: React, Tailwind CSS, Axios, TanStack, Node.js, Express, MongoDB, Firebase, Swiper, React Simple Captcha, React Tabs, React Image Zoom, Moment.js, React Hook Form. Integrated with Pathao and Steadfast APIs for delivery services. Facebook Pixel integration for analytics and Facebook Messenger chat integration for real-time customer support.
